## Distributed Communities on the Web: 4th International Workshop, DCW 2002 Sydney, Australia, April 3-5, 2002, Revised Papers (Lecture Notes in Computer Science)

Communities are groupings of distributed objects that communicate, directly or indirectly, through the medium of a shared context. This conference brought together researchers interested in the technical issues of supporting communities. DCW 2002 was held in Sydney, Australia, and was hosted by the Software Engineering Research Group and the School of Computer Science and Engineering at the University of New South Wales. It was the fourth in the DCW series, the previous conferences having taken place in Quebec (2000, LNCS 1830) and in Rostock (1998 and 1999, University of Rostock Press).

The program committee selected 25 papers from 59 submissions from around the world. Each submission was fully refereed by at least three reviewers, either members of the program committee or other external referees. Reviewers were selected to ensure they had the required expertise for the papers' topics. Special care was taken to avoid conflicts of interest by ensuring that if a program committee member was co-author of one of the submissions, then the paper would be reviewed by program committee members or additional reviewers who were not close collaborators of the submitting authors.

In addition to these papers, the proceedings begin with a fully refereed primary chapter, entitled Open Problems in Distributed Communities, which gives an overview of the field. This year, we were pleased to welcome as the invited speaker Philippe van Nederveelde, CEO of E-SPACES (Belgium) and X3D Technologies (USA), who gave us a fascinating presentation on Virtual 3D World Communities. We would like to thank the members of the program committee and the additional reviewers for the thorough reviews of the submitted papers, the authors for submitting their contributions, and the authors of accepted papers for their collaboration in preparing these proceedings. Special thanks go to Blanca Mancilla, the local arrangements chair, for all the work she did before, during, and after the conference. We are convinced that this conference series is very timely, and meets the needs of many researchers interested in building networked communities. We hope that you find the proceedings interesting and stimulating, and hope that you will join us in Ulm in Spring 2004 for the next DCW conference. September 2002  
John Plaice Peter Kropf  
Peter Schulthess Jacob Slonim  
Organization DCW 2002 was organized with the support of the School of Computer Science and Engineering and the Software Engineering Research Group at the University of New South Wales, Sydney, Australia, in cooperation with ACM, ACM SIGPLAN, and ACM SIGWEB.

### **From reader reviews:**

#### **Jacqueline Campbell:**

Exactly why? Because this Distributed Communities on the Web: 4th International Workshop, DCW 2002 Sydney, Australia, April 3-5, 2002, Revised Papers (Lecture Notes in Computer Science) is an unordinary book that the inside of the publication waiting for you to snap that but latter it will distress you with the secret the item inside. Reading this book beside it was fantastic author who also write the book in such remarkable way makes the content within easier to understand, entertaining means but still convey the meaning totally. So , it is good for you because of not hesitating having this ever again or you going to regret it. This unique book will give you a lot of advantages than the other book include such as help improving your ability and your critical thinking means. So , still want to hold up having that book? If I have been you I will go to the book store hurriedly.

#### **Eric Butler:**

Beside this Distributed Communities on the Web: 4th International Workshop, DCW 2002 Sydney, Australia, April 3-5, 2002, Revised Papers (Lecture Notes in Computer Science) in your phone, it might give you a way to get nearer to the new knowledge or facts. The information and the knowledge you will got here is fresh from the oven so don't possibly be worry if you feel like an old people live in narrow commune. It is good thing to have Distributed Communities on the Web: 4th International Workshop, DCW 2002 Sydney, Australia, April 3-5, 2002, Revised Papers (Lecture Notes in Computer Science) because this book offers to you readable information. Do you at times have book but you would not get what it's all about. Oh come on, that will not happen if you have this within your hand. The Enjoyable arrangement here cannot be questionable, like treasuring beautiful island. So do you still want to miss it? Find this book as well as read it from at this point!

#### **Sandra Passmore:**

That guide can make you to feel relax. This specific book Distributed Communities on the Web: 4th International Workshop, DCW 2002 Sydney, Australia, April 3-5, 2002, Revised Papers (Lecture Notes in Computer Science) was multi-colored and of course has pictures on the website. As we know that book Distributed Communities on the Web: 4th International Workshop, DCW 2002 Sydney, Australia, April 3-5, 2002, Revised Papers (Lecture Notes in Computer Science) has many kinds or type. Start from kids until teenagers. For example Naruto or Investigator Conan you can read and think that you are the character on there. Therefore , not at all of book are make you bored, any it offers up you feel happy, fun and unwind. Try to choose the best book in your case and try to like reading that.

#### **Beverly Woods:**

As a college student exactly feel bored to reading. If their teacher requested them to go to the library as well as to make summary for some publication, they are complained. Just tiny students that has reading's soul or

real their hobby. They just do what the instructor want, like asked to the library. They go to right now there but nothing reading seriously. Any students feel that reading through is not important, boring in addition to can't see colorful photos on there. Yeah, it is to become complicated. Book is very important to suit your needs. As we know that on this period of time, many ways to get whatever we really wish for. Likewise word says, many ways to reach Chinese's country. Therefore this Distributed Communities on the Web: 4th International Workshop, DCW 2002 Sydney, Australia, April 3-5, 2002, Revised Papers (Lecture Notes in Computer Science) can make you truly feel more interested to read.
