## **Driver Acceptance of New Technology: Theory, Measurement and Optimisation (Human Factors in Road and Rail Transport) Tim Horberry**

Acceptance of new technology and systems by drivers is an important area of concern to governments, automotive manufacturers and equipment suppliers, especially technology that has significant potential to enhance safety. To be acceptable, new technology must be useful and satisfying to use. If not, drivers will not want to have it, in which case it will never achieve the intended safety benefit. Even if they have the technology, drivers may not use it if it is deemed unacceptable, or may not use it in the manner intended by the designer. At worst, they may seek to disable it. This book brings into a single edited volume the accumulating body of thinking and research on driver and operator acceptance of new technology. Bringing together contributions from international experts from around the world, the editors have shaped a book that covers the theory behind acceptance, how it can be measured and how it can be improved. Case studies are presented that provide data on driver acceptance of a wide range of new and emerging vehicle technology. Although driver acceptance is the central focus of this book, acceptance of new technology by operators in other domains, and across cultures, is also investigated. Similarly, perspectives are derived from domains such as human computer interaction, where user acceptance has long been regarded as a key driver of product success. This book comes at a critical time in the history of the modern motor vehicle, as the number of new technologies entering the modern vehicle cockpit rapidly escalates. The goal of this book is to inspire further research and development of new vehicle technology to optimise user acceptance of it; and, in doing so, to maximise its potential to be useful, satisfying to use and able to save human life.

### **From reader reviews:**

#### **Shawna Vaughn:**

The book *Driver Acceptance of New Technology: Theory, Measurement and Optimisation (Human Factors in Road and Rail Transport)* can give more knowledge and information about everything you want. Exactly why must we leave the best thing like a book *Driver Acceptance of New Technology: Theory, Measurement and Optimisation (Human Factors in Road and Rail Transport)*? A few of you have a different opinion about book. But one aim which book can give many information for us. It is absolutely proper. Right now, try to closer with your book. Knowledge or facts that you take for that, it is possible to give for each other; you may share all of these. Book *Driver Acceptance of New Technology: Theory, Measurement and Optimisation (Human Factors in Road and Rail Transport)* has simple shape but the truth is know: it has great and massive function for you. You can search the enormous world by open up and read a reserve. So it is very wonderful.

#### **Antonia Parham:**

Here thing why that *Driver Acceptance of New Technology: Theory, Measurement and Optimisation (Human Factors in Road and Rail Transport)* are different and trustworthy to be yours. First of all reading through a book is good but it depends in the content of computer which is the content is as scrumptious as food or not. *Driver Acceptance of New Technology: Theory, Measurement and Optimisation (Human Factors in Road and Rail Transport)* giving you information deeper since different ways, you can find any publication out there but there is no publication that similar with *Driver Acceptance of New Technology: Theory, Measurement and Optimisation (Human Factors in Road and Rail Transport)*. It gives you thrill examining journey, its open up your own eyes about the thing that will happened in the world which is probably can be happened around you. You can easily bring everywhere like in park your car, café, or even in your way home by train. When you are having difficulties in bringing the imprinted book maybe the form of *Driver Acceptance of New Technology: Theory, Measurement and Optimisation (Human Factors in Road and Rail Transport)* in e-book can be your choice.

#### **Jeffery Herring:**

A lot of people always spent their own free time to vacation or even go to the outside with them family members or their friend. Do you know? Many a lot of people spent that they free time just watching TV, as well as playing video games all day long. If you need to try to find a new activity honestly, that is look different you can read a new book. It is really fun for you personally. If you enjoy the book which you read you can spent the entire day to reading a e-book. The book *Driver Acceptance of New Technology: Theory, Measurement and Optimisation (Human Factors in Road and Rail Transport)* it is rather good to read. There are a lot of individuals who recommended this book. They were enjoying reading this book. In the event you did not have enough space to develop this book you can buy often the e-book. You can m0ore very easily to read this book through your smart phone. The price is not to fund but this book has high quality.

**Meghan Drucker:**

A lot of reserve has printed but it differs from the others. You can get it by net on social media. You can choose the top book for you, science, witty, novel, or whatever by searching from it. It is called of book Driver Acceptance of New Technology: Theory, Measurement and Optimisation (Human Factors in Road and Rail Transport). You'll be able to your knowledge by it. Without departing the printed book, it can add your knowledge and make anyone happier to read. It is most important that, you must aware about reserve. It can bring you from one destination to other place.
