The \$1,000 Genome: The Revolution in DNA Sequencing and the New Era of Personalized Medicine

Kevin Davies

Since the conclusion of the Human Genome Project in 2003, scientists have been racing toward a grand goal: offering individuals a decoding of their complete genetic makeup for just \$1,000. As Kevin Davies reveals in this exquisitely reported account, the \$1,000 genome will be a reality by 2011 and it will usher in a whole new era of personalized, genomic medicine. Capable of presenting much more advanced information than the current crop of cheek-swab services, the \$1,000 complete genome raises some extraordinary possibilities. We will be able to learn if we have genes that predispose us to a host of diseases and to take a wide range of preventative measures. Drug companies may be able to create versions of drugs tailored specifically to our individual DNA. But we may also face the psychological burden of learning that we have the gene for an incurable disease, such as Parkinson's. Acclaimed author Kevin Davies introduces the pioneers of this medical revolution and probes deeply into both the medical benefits and ethical issues of personal genetic testing, also exploring the psychological complexities of learning one's DNA results, based on both his own experience of being tested and that of a number of others. The \$1,000 Genome is an indispensable guide to the new era of personalized medicine.

From reader reviews:

Robert Rios:

The feeling that you get from The \$1,000 Genome: The Revolution in DNA Sequencing and the New Era of Personalized Medicine could be the more deep you rooting the information that hide inside the words the more you get thinking about reading it. It does not mean that this book is hard to be aware of but The \$1,000 Genome: The Revolution in DNA Sequencing and the New Era of Personalized Medicine giving you joy feeling of reading. The article author conveys their point in certain way that can be understood simply by anyone who read it because the author of this guide is well-known enough. This specific book also makes your own personal vocabulary increase well. That makes it easy to understand then can go together with you, both in printed or e-book style are available. We advise you for having this The \$1,000 Genome: The Revolution in DNA Sequencing and the New Era of Personalized Medicine instantly.

Patrick Spradlin:

Information is provisions for individuals to get better life, information these days can get by anyone on everywhere. The information can be a expertise or any news even an issue. What people must be consider if those information which is inside the former life are difficult to be find than now is taking seriously which one is suitable to believe or which one the particular resource are convinced. If you obtain the unstable resource then you understand it as your main information there will be huge disadvantage for you. All of those possibilities will not happen throughout you if you take The \$1,000 Genome: The Revolution in DNA Sequencing and the New Era of Personalized Medicine as your daily resource information.

Clara Palmer:

This book untitled The \$1,000 Genome: The Revolution in DNA Sequencing and the New Era of Personalized Medicine to be one of several books in which best seller in this year, that's because when you read this guide you can get a lot of benefit upon it. You will easily to buy that book in the book shop or you can order it by using online. The publisher in this book sells the e-book too. It makes you easier to read this book, because you can read this book in your Cell phone. So there is no reason to you to past this publication from your list.

Patrick Austin:

Do you have something that you want such as book? The book lovers usually prefer to pick book like comic, quick story and the biggest some may be novel. Now, why not hoping The \$1,000 Genome: The Revolution in DNA Sequencing and the New Era of Personalized Medicine that give your fun preference will be satisfied by simply reading this book. Reading routine all over the world can be said as the opportunity for people to know world far better then how they react to the world. It can't be stated constantly that reading routine only for the geeky man or woman but for all of you who wants to end up being success person. So , for all of you who want to start looking at as your good habit, you may pick The \$1,000 Genome: The

Revolution in DNA Sequencing and the New Era of Personalized Medicine become your personal starter.
