A Tradecraft Primer: Structured Analytic Techniques for Improving Intelligence Analysis - Cognitive and Perceptual Biases, Reasoning Processes Central Intelligence Agency (CIA)

This primer highlights structured analytic techniques—some widely used in the private sector and academia, some unique to the intelligence profession. It is not a comprehensive overview of how intelligence officers conduct analysis. Rather, the primer highlights how structured analytic techniques can help one challenge judgments, identify mental mindsets, stimulate creativity, and manage uncertainty. In short, incorporating regular use of techniques such as these can enable one to structure thinking for wrestling with difficult questions.

Using the analytic techniques contained in this primer will assist analysts in dealing with the perennial problems of intelligence: the complexity of international developments, incomplete and ambiguous information, and the inherent limitations of the human mind. Understanding the intentions and capabilities of adversaries and other foreign actors is challenging, especially when either or both are concealed. Moreover, transnational threats today pose even greater complexity, in that they involve multiple actors—including nonstate entities—that can adapt and transform themselves faster than those who seek to monitor and contain them. Finally, globalization has increased the diversity of outcomes when complex, interactive systems such as financial flows, regional economies or the international system as a whole are in flux.

The first hurdle for analysts is identifying the relevant and diagnostic information from the increasing volume of ambiguous and contradictory data that is acquired through open source and clandestine means. Analysts must also pierce the shroud of secrecy—and sometimes deception—that state and nonstate actors use to mislead. A systematic approach that considers a range of alternative explanations and outcomes offers one way to ensure that analysts do not dismiss potentially relevant hypotheses and supporting information resulting in missed opportunities to warn.

Cognitive and perceptual biases in human perception and judgment are another important reason for analysts to consider alternatives. As Richards Heuer and others have argued, all individuals assimilate and evaluate information through the medium of "mental models" (sometimes also called "frames" or "mind-sets"). These are experience-based constructs of assumptions and expectations both about the world in general and more specific domains. These constructs strongly influence what information analysts will accept—that is, data that are in accordance with analysts' unconscious mental models are more likely to be perceived and remembered than information that is at odds with them.

Mental models are critical to allowing individuals to process what otherwise would be an incomprehensible volume of information. Yet, they can cause analysts to overlook, reject, or forget important incoming or missing information that is not in accord with their assumptions and expectations. Seasoned analysts may be more susceptible to these mind-set problems as a result of their expertise and past success in using time-tested mental models. The key risks of mindsets are that: analysts perceive what they expect to perceive; once formed, they are resistant to change; new information is assimilated, sometimes erroneously, into existing mental models; and conflicting information is often dismissed or ignored. Intelligence analysts should be self-conscious about their reasoning processes. They should think about how they make judgments

and reach conclusions, not just about the judgments and conclusions themselves.

From reader reviews:

Christine McClellan:

Why don't make it to be your habit? Right now, try to prepare your time to do the important action, like looking for your favorite e-book and reading a reserve. Beside you can solve your long lasting problem; you can add your knowledge by the publication entitled A Tradecraft Primer: Structured Analytic Techniques for Improving Intelligence Analysis - Cognitive and Perceptual Biases, Reasoning Processes. Try to make book A Tradecraft Primer: Structured Analytic Techniques for Improving Intelligence Analysis - Cognitive and Perceptual Biases, Reasoning Processes as your close friend. It means that it can being your friend when you sense alone and beside regarding course make you smarter than in the past. Yeah, it is very fortunated for you. The book makes you considerably more confidence because you can know every thing by the book. So , let us make new experience along with knowledge with this book.

Don Numbers:

This A Tradecraft Primer: Structured Analytic Techniques for Improving Intelligence Analysis - Cognitive and Perceptual Biases, Reasoning Processes book is not really ordinary book, you have it then the world is in your hands. The benefit you will get by reading this book will be information inside this reserve incredible fresh, you will get details which is getting deeper you read a lot of information you will get. That A Tradecraft Primer: Structured Analytic Techniques for Improving Intelligence Analysis - Cognitive and Perceptual Biases, Reasoning Processes without we comprehend teach the one who examining it become critical in contemplating and analyzing. Don't possibly be worry A Tradecraft Primer: Structured Analytic Techniques for Improving Intelligence Analysis - Cognitive and Perceptual Biases, Reasoning Processes can bring once you are and not make your handbag space or bookshelves' turn into full because you can have it in your lovely laptop even mobile phone. This A Tradecraft Primer: Structured Analytic Techniques for Improving Intelligence Analysis - Cognitive and Perceptual Biases, Reasoning Processes having good arrangement in word as well as layout, so you will not feel uninterested in reading.

Irma Chavez:

Here thing why this kind of A Tradecraft Primer: Structured Analytic Techniques for Improving Intelligence Analysis - Cognitive and Perceptual Biases, Reasoning Processes are different and trusted to be yours. First of all examining a book is good nevertheless it depends in the content of the usb ports which is the content is as scrumptious as food or not. A Tradecraft Primer: Structured Analytic Techniques for Improving Intelligence Analysis - Cognitive and Perceptual Biases, Reasoning Processes giving you information deeper and different ways, you can find any guide out there but there is no guide that similar with A Tradecraft Primer: Structured Analytic Techniques for Improving Intelligence Analysis - Cognitive and Perceptual Biases, Reasoning Processes. It gives you thrill studying journey, its open up your current eyes about the thing which happened in the world which is maybe can be happened around you. You can bring everywhere like in area, café, or even in your means home by train. Should you be having difficulties in bringing the printed book maybe the form of A Tradecraft Primer: Structured Analytic Techniques for Improving Intelligence Analysis - Cognitive and Perceptual Biases, Reasoning Processes in e-book can be your option.

Earnest Koontz:

This book untitled A Tradecraft Primer: Structured Analytic Techniques for Improving Intelligence Analysis - Cognitive and Perceptual Biases, Reasoning Processes to be one of several books that will best seller in this year, honestly, that is because when you read this guide you can get a lot of benefit onto it. You will easily to buy that book in the book retail outlet or you can order it by using online. The publisher in this book sells the e-book too. It makes you quickly to read this book, because you can read this book in your Touch screen phone. So there is no reason for you to past this e-book from your list.
