## Armas, gérmenes y acero (Guns, Germs, and Steel: The Fates of Human Societies) (Spanish Edition)

Jared Diamond

Hace trece mil años la evolución de las distintas sociedades humanas comenzó a tomar rumbos diferentes. La domesticación de los animales y el cultivo de plantas silvestres en China, Mesoamérica y otras zonas geográficas otorgaron una ventaja inicial a los habitantes de esas regiones.

Sin embargo, los orígenes localizados de la agricultura y la ganadería son solo parte de la explicación de los diferentes destinos de los pueblos. Las sociedades que superaron esta fase de cazadores-recolectores se encontraron con más posibilidades para desarrollar la escritura, la tecnología o las estructuras políticas; además de sobrevivir a gérmenes nocivos y crear poderosas armas bélicas.

En este libro, el profesor Jared Diamond demuestra que la diversidad cultural hunde sus raíces en las diferencias geográficas, ecológicas y territoriales ligadas a cada caso concreto, y analiza cómo evolucionó la humanidad y por qué unos pueblos avanzaron hacia la civilización mientras que otros se quedaron estancados.

## ENGLISH DESCRIPTION

**"Fascinating.... Lays a foundation for understanding human history." Bill Gates**

In this "artful, informative, and delightful" (William H. McNeill, New York Review of Books) book, Jared Diamond convincingly argues that geographical and environmental factors shaped the modern world. Societies that had had a head start in food production advanced beyond the hunter-gatherer stage, and then developed religion --as well as nasty germs and potent weapons of war --and adventured on sea and land to conquer and decimate preliterate cultures. A major advance in our understanding of human societies, *Guns, Germs, and Steel* chronicles the way that the modern world came to be and stunningly dismantles racially based theories of human history. Winner of the Pulitzer Prize, the Phi Beta Kappa Award in Science, the Rhone-Poulenc Prize, and the Commonwealth Club of California's Gold Medal.
