Reproductive Physiology of Marsupials (Monographs on Marsupial Biology)

Hugh Tyndale-Biscoe, Marilyn Renfree

Reproductive Physiology of Marsupials (Monographs on Marsupial Biology) Hugh Tyndale-Biscoe, Marilyn Renfree

Marsupials differ from most other mammals in their method of reproduction, in that they have chosen, in an evolutionary sense, to develop lactation rather than placentation for the nurture of their young. The neonate is therefore born with a mixture of advanced and embryonic characters, and yet is readily accessible within the pouch, providing a unique system for the study of the ontogeny of various physiological and endocrinological parameters. Marsupials are therefore ideal animals for research into mammalian reproductive physiology. The results of this exciting new research are summarized in this book by two of the foremost workers in the field. Individual chapters analyse the genetic and hormonal control of sexual differentiation, male and female reproductive structures and their functions, the role of the corpus luteum in the oestrous cycle and pregnancy, the hormonal control of embryonic diapause and the role of the marsupial placenta in the development of the embryo. This book is more than just a straightforward review of marsupial reproduction for its detailed analyses and broad comparative coverage will attract mammalogists and reproductive physiologists with a wide range of research interests.

From reader reviews:

Alan Levin:

Do you one of people who can't read pleasant if the sentence chained inside straightway, hold on guys this particular aren't like that. This Reproductive Physiology of Marsupials (Monographs on Marsupial Biology) book is readable simply by you who hate the perfect word style. You will find the info here are arrange for enjoyable reading experience without leaving also decrease the knowledge that want to give to you. The writer regarding Reproductive Physiology of Marsupials (Monographs on Marsupial Biology) content conveys the idea easily to understand by many people. The printed and e-book are not different in the written content but it just different in the form of it. So , do you continue to thinking Reproductive Physiology of Marsupials (Monographs on Marsupial Biology) is not loveable to be your top checklist reading book?

Allen Goehring:

This book untitled Reproductive Physiology of Marsupials (Monographs on Marsupial Biology) to be one of several books which best seller in this year, honestly, that is because when you read this book you can get a lot of benefit on it. You will easily to buy this specific book in the book retail store or you can order it by means of online. The publisher of the book sells the e-book too. It makes you more easily to read this book, since you can read this book in your Touch screen phone. So there is no reason to you personally to past this publication from your list.

Sharon Lopez:

The book Reproductive Physiology of Marsupials (Monographs on Marsupial Biology) will bring someone to the new experience of reading a book. The author style to describe the idea is very unique. In case you try to find new book to study, this book very acceptable to you. The book Reproductive Physiology of Marsupials (Monographs on Marsupial Biology) is much recommended to you to read. You can also get the e-book through the official web site, so you can quickly to read the book.

George Medrano:

Publication is one of source of knowledge. We can add our information from it. Not only for students but also native or citizen want book to know the up-date information of year to be able to year. As we know those books have many advantages. Beside we all add our knowledge, can also bring us to around the world. From the book Reproductive Physiology of Marsupials (Monographs on Marsupial Biology) we can acquire more advantage. Don't you to definitely be creative people? To be creative person must like to read a book. Just choose the best book that appropriate with your aim. Don't end up being doubt to change your life at this book Reproductive Physiology of Marsupials (Monographs on Marsupial Biology). You can more pleasing than now.
