## **Logic, Set Theory, Axiomatics (Math Enrichment Series Book 1) Richard Davis**

This book series presents an effective way of understanding crucial mathematical concepts. By enriching the reader's grasp of these concepts, the reader will enhance his or her mathematical tool set and problem solving skills. This book series helps the reader view math differently from before. Being set on the right path, the reader will be able to tackle challenges in related subjects. After full mastery, the reader will gain complete command of mathematical understanding and problem solving power.

This book series is written for students in high school and beyond, but it is also recommended for advanced middle school students. Early exposure is helpful. Students aiming to major in the science and engineering field or finance will benefit, because the reader will learn a holistic approach toward problem solving instead of a situation based approach. This is an essential skill to have when studying or researching.

The book series is comprised of these volumes:

Volume 1: LOGIC, SET THEORY AND AXIOMATICS

ISBN: 978-0-9718657-5-4

Volume 2: GEOMETRY

ISBN: 978-0-9718657-6-1

Volume 3: ALGEBRA

ISBN: 978-0-9718657-7-8

Volume 4: PROBABILITY AND STATISTICS

ISBN: 978-0-9718657-8-5

Volume 5: WORD PROBLEMS

ISBN: 978-0-9718657-9-2

The subject and topics for all volumes of this book series have been specifically selected and filtered to give only the necessary information that students will need to advance their studies. The subjects are not presented comprehensively as in traditional texts to concentrate on the absolutely essential topics in further detail. These subjects form a tight chain foundation. All together, a deeper understanding of the essential topics in these core subjects will help the reader strengthen the perquisite skills needed for college level classes and, most importantly, the ability to forge one's own path in learning and problem solving independently.

Logic, set theory, and axiomatics are presented in Volume 1 to give students a foundation for understanding the basis of many areas of mathematical theory. The subject of Volume 1 is an essential for bolstering critical thinking and developing proofs. Volume 2 and Volume 3 give readers insight regarding theories in geometry and algebra to help develop proficiency. Volume 4 is devoted to concepts in probability and statistics that are a requirement for students of various disciplines including the human sciences. In Volume 5, fourteen types of word problems are dissected to teach the language interpretation of word problems for deriving and implementing the correct solution. Volume 5 also serves to apply all the concepts from the previous volumes in practice which is important for developing skill.

It is recommended to read slowly and let time help the absorption. The reader should choose his or her own

journey and pace, but study seriously. Frequent review will enrich the reader's understanding of the topics. If any concept seems too difficult, the section can be skipped for a later time, especially if the reader is from the earlier grade levels. Each topic is presented at a deeper level, so it is natural to find the content challenging at first, even if the reader has already studied the topic before.

**From reader reviews:**

**Heidi Odom:**

Do you have favorite book? For those who have, what is your favorite's book? Book is very important thing for us to be aware of everything in the world. Each publication has different aim as well as goal; it means that guide has different type. Some people experience enjoy to spend their a chance to read a book. They are reading whatever they get because their hobby is actually reading a book. Think about the person who don't like looking at a book? Sometime, individual feel need book once they found difficult problem or perhaps exercise. Well, probably you will want this Logic, Set Theory, Axiomatics (Math Enrichment Series Book 1).

**Carl Kile:**

What do you regarding book? It is not important to you? Or just adding material when you need something to explain what yours problem? How about your extra time? Or are you busy person? If you don't have spare time to perform others business, it is make one feel bored faster. And you have extra time? What did you do? Everybody has many questions above. They should answer that question since just their can do this. It said that about publication. Book is familiar in each person. Yes, it is proper. Because start from on pre-school until university need this Logic, Set Theory, Axiomatics (Math Enrichment Series Book 1) to read.

**Lloyd Lake:**

This Logic, Set Theory, Axiomatics (Math Enrichment Series Book 1) book is not really ordinary book, you have it then the world is in your hands. The benefit you have by reading this book will be information inside this reserve incredible fresh, you will get details which is getting deeper a person read a lot of information you will get. This specific Logic, Set Theory, Axiomatics (Math Enrichment Series Book 1) without we recognize teach the one who studying it become critical in pondering and analyzing. Don't be worry Logic, Set Theory, Axiomatics (Math Enrichment Series Book 1) can bring whenever you are and not make your handbag space or bookshelves' turn out to be full because you can have it within your lovely laptop even cellphone. This Logic, Set Theory, Axiomatics (Math Enrichment Series Book 1) having good arrangement in word along with layout, so you will not experience uninterested in reading.

**Stacey Greene:**

Book is one of source of understanding. We can add our knowledge from it. Not only for students and also native or citizen will need book to know the update information of year for you to year. As we know those publications have many advantages. Beside all of us add our knowledge, can also bring us to around the world. Through the book Logic, Set Theory, Axiomatics (Math Enrichment Series Book 1) we can have more advantage. Don't one to be creative people? Being creative person must want to read a book. Just choose the best book that acceptable with your aim. Don't always be doubt to change your life with this book Logic, Set Theory, Axiomatics (Math Enrichment Series Book 1). You can more inviting than now.
