Sustainable Building Systems and Construction for Designers

Lisa M. Tucker

Sustainable Building Systems and Construction for Designers Lisa M. Tucker

This text views building construction and its systems through the lens of sustainability, providing an integrated approach to the principles of sustainable design as the way a building is created. As a practicing architect and interior designer, Tucker covers all systems including construction systems, mechanical systems, electrical and plumbing systems, and interior systems. The technical knowledge and vocabulary presented here allow interior designers, architects, engineers, and contractors to communicate more effectively among themselves while collaborating on projects.
