Making Silicon Valley: Innovation and the Growth of High Tech, 1930-1970 (Inside Technology)

Christophe Lécuyer

In *Making Silicon Valley*, Christophe Lécuyer shows that the explosive growth of the personal computer industry in Silicon Valley was the culmination of decades of growth and innovation in the San Francisco-area electronics industry. Using the tools of science and technology studies, he explores the formation of Silicon Valley as an industrial district, from its beginnings as the home of a few radio enterprises that operated in the shadow of RCA and other East Coast firms through its establishment as a center of the electronics industry and a leading producer of power grid tubes, microwave tubes, and semiconductors. He traces the emergence of the innovative practices that made this growth possible by following key groups of engineers and entrepreneurs. He examines the forces outside Silicon Valley that shaped the industry -- in particular the effect of military patronage and procurement on the growth of the industry and on the development of technologies -- and considers the influence of Stanford University and other local institutions of higher learning.

Lécuyer argues that Silicon Valley's emergence and its growth were made possible by the development of unique competencies in manufacturing, in product engineering, and in management. Entrepreneurs learned to integrate invention, design, manufacturing, and sales logistics, and they developed incentives to attract and retain a skilled and motivated workforce. The largest Silicon Valley firms -- including Eitel-McCullough (Eimac), Litton Industries, Varian Associates, Fairchild Semiconductor, and Intel -- dominated the American markets for advanced tubes and semiconductors and, because of their innovations in manufacturing, design, and management, served as models and incubators for other electronics ventures in the area.

From reader reviews:

Aimee Nguyen:

The e-book with title Making Silicon Valley: Innovation and the Growth of High Tech, 1930-1970 (Inside Technology) includes a lot of information that you can find out it. You can get a lot of benefit after read this book. This specific book exist new understanding the information that exist in this guide represented the condition of the world right now. That is important to yo7u to be aware of how the improvement of the world. This book will bring you inside new era of the globalization. You can read the e-book on the smart phone, so you can read the item anywhere you want.

Roger Cooper:

Reading can called brain hangout, why? Because when you are reading a book specifically book entitled Making Silicon Valley: Innovation and the Growth of High Tech, 1930-1970 (Inside Technology) your brain will drift away trough every dimension, wandering in most aspect that maybe unidentified for but surely will end up your mind friends. Imaging every word written in a reserve then become one contact form conclusion and explanation that maybe you never get ahead of. The Making Silicon Valley: Innovation and the Growth of High Tech, 1930-1970 (Inside Technology) giving you an additional experience more than blown away your brain but also giving you useful info for your better life within this era. So now let us present to you the relaxing pattern here is your body and mind will likely be pleased when you are finished reading through it, like winning an activity. Do you want to try this extraordinary wasting spare time activity?

David Hosford:

Do you really one of the book lovers? If yes, do you ever feeling doubt when you are in the book store? Aim to pick one book that you find out the inside because don't determine book by its protect may doesn't work here is difficult job because you are scared that the inside maybe not seeing that fantastic as in the outside appear likes. Maybe you answer is usually Making Silicon Valley: Innovation and the Growth of High Tech, 1930-1970 (Inside Technology) why because the great cover that make you consider about the content will not disappoint anyone. The inside or content is usually fantastic as the outside as well as cover. Your reading sixth sense will directly show you to pick up this book.

Patricia Phipps:

What is your hobby? Have you heard that will question when you got scholars? We believe that that question was given by teacher for their students. Many kinds of hobby, Every individual has different hobby. And you know that little person like reading or as looking at become their hobby. You need to understand that reading is very important as well as book as to be the factor. Book is important thing to add you knowledge, except your current teacher or lecturer. You discover good news or update regarding something by book. A substantial number of sorts of books that can you choose to use be your object. One of them is actually Making Silicon Valley: Innovation and the Growth of High Tech, 1930-1970 (Inside Technology).
